

The Konica Minolta Group aims to create new value through collective strength

The Konica Minolta Group is comprised of multiple Business Companies and Common Function Companies operating under the Holding Company.

The Business Companies, with the requisite authority and responsibilities, pursue operations directly related to their particular business activities, while the Common Function Companies perform R&D and indirect business functions for all members of the Group. Business Companies exercise their unique strengths and seek Group synergies as they strive to create new value sought by society.

Corporate Governance System

Konica Minolta employs a holding company system, comprising a holding company and separate business and common function companies. The holding company uses a company-with-committees system consisting of the Nominating Committee, the Audit Committee and the Compensation Committee, with directors handling management supervision and executive officers in charge of business execution.

This system is designed to accelerate Group management and ensure management soundness and transparency.

¹ Nominating Committee: nomination of director candidates ² Audit Committee: audit of the execution of the duties by directors and executive officers ³ Compensation Committee: determination of compensation for directors and executive officers
