SDSSAFETY DATA SHEET

1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND THE COMPANY/UNDERTAKING

1.1 Identification of the product

Trade Name: JV3D - 3D UV VARNISH - 18L JV3D - 3D UV VARNISH - 6L

PN 9655S (18L) and 8477S (6L)

1.2 Relevant identified uses of the substance or mixture and uses advised against

Used for: JETvarnish 3D Classic (18L/6L) - JETvarnish 3DL (18L)

1.3 Details of the supplier of the safety data sheet

Manufacturer / Supplier:

MGI Digital Technology 4, rue de la Méridienne 94260 Fresnes FRANCE

Tel.: +33 1 45 21 06 60 / Fax: +33 1 46 68 71 55 E-mail: info@mgi-fr.com / http://www.mgi-fr.com

Precautionary statements

Prevention

P264 Wash hands thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P261 Avoid breathing dust/fume/gas/mist/vapors/spray.

P272 Contaminated work clothing should not be allowed out of the workplace.

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P405 Store locked up.

P403+P233 Store in a well-ventilated place. Keep container tightly closed.

P271 Use only outdoors or in a well-ventilated area.

P501 Dispose of contents / container in accordance with local / national / international regulations.

P273 Avoid release to the environment.

P391 Collect spillage.

Intervention

P302+P352 If on skin: wash with plenty of water.

P332+P313 If skin irritation occurs: Get medical advice/attention.

P305+P351+P338 If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing.

P304+P340 If inhaled: Remove person to fresh air and keep comfortable for breathing.

P337+P313 If eye irritation persists: Get medical advice/attention.

P308+P313 If exposed or concerned: Get medical advice/attention.

P362+P364 Take off contaminated clothing and wash it before reuse.

P312 Call a poison center or doctor if you feel unwell.

4. FIRST AID MEASURES

4.1 Description of first aid measures

Skin Contact: Destroy or thoroughly clean contaminated shoes. Immediately remove contaminated clothing and shoes and wash skin with soap and plenty of water. If skin irritation or an allergic skin reaction develops, get medical attention.

Eye Contact: Wash open eyes immediately, abundantly and thoroughly for at least 15 minutes. Seek advice of an ophthalmologist if necessary.

Inhalation: Move to fresh air.

Ingestion: Do NOT induce vomiting. Rinse mouth. Consult a physician if necessary.

#42

4.2 Most important symptoms and effects, both acute and delayed

See section 11 for additional information on health hazards.

4.3 Indication of any immediate medical attention and special treatment needed

See section 11 for additional information on health hazards.

5. FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media: Extinguish with foam, carbon dioxide, dry powder or water fog. Unsuitable extinguishing media: Do not use water jet as an extinguisher, as this will spread the fire.

5.2 Special hazards arising from the substance or mixture

During fire, gases hazardous to health may be formed (Carbon oxides).

5.3 Advice for firefighter

Special firefighting procedures: No data available.

Special protective equipment for fire-fighters: Self-contained breathing apparatus and full protective clothing

must be worn in case of fire.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

See Section 8 for Personal Protective Equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep unauthorized personnel away.

6.2 Environmental precautions:

Avoid release to the environment. Prevent further leakage or spillage if safe to do so.

6.3 Methods and material for containment and cleaning up:

Stop the flow of material, if this is without risk. Absorb with sand or other inert absorbent.

6.4 Reference to other sections

See Section 7 for handling

See Section 8 for Personal Protective Equipment.

See Section 13 for waste disposal.

7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Avoid contact with eyes, skin, and clothing. Wash hands thoroughly after handling. Keep away from heat, sparks and flame. Do not eat, drink or smoke when using material.

7.2 Conditions for safe storage, including any incompatibilities

Store between 15°C and 30°C max (59-86°F) and in original container. Protect from frost, heat and sunlight (risk of polymerization). Keep away from open flames, hot surfaces and sources of ignition. Make sure of the presence of air and inhibitor in the drums. In addition, the product's inhibitor(s) require the presence of dissolved oxygen. An air space is required above the liquid in all containers; avoid storage under an oxygen-free atmosphere. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

7.3 Specific end use(s)

Reserved for industrial and professional use

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Control parameters

This product, as supplied, does not contain any hazardous materials with occupational exposure limits established by the region specific regulatory bodies.

#42

8.2 Exposure controls

Appropriate engineering controls:

Provide adequate ventilation.

Personal protective equipment:

Safety glasses

Gloves

Respiratory protection: In case of inadequate ventilation use suitable respirator.

Hand protection: Protective gloves should be used if there is a risk of direct contact or splash. Chemical resistant gloves required for prolonged or repeated contact. Nitrile gloves are recommended but be aware that the liquid may penetrate the gloves. Frequent change is advisable. The most suitable glove must be chosen in consultation with the gloves supplier, who can inform about the breakthrough time of the glove material.

Eye/face protection: Safety glasses with side-shields. Do not wear contact lenses.

Skin and body protection: Long sleeved clothing

Environmental exposure controls:

See Section 6

9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Appearance:

Physical state (20°C): Liquid Color. Colorless to yellow

Odor: Sweetish

Olfactory threshold: No data available.

pH: Not applicable.

Melting point / range: No data available. Boiling point / range: No data available.

Flash point: > 110°C (212°F)

Evaporation rate: No data available.
Flammability (solid, gas): Not applicable.
Vapor pressure: No data available.
Vapor density: No data available.

Density: >1

Water solubility: Insoluble

Auto-ignition temperature: No data available. **Decomposition temperature:** No data available.

Viscosity: 15-25mPa.s; 25 °C

10. STABILITY AND REACTIVITY

10.1 Reactivity

No data available.

10.2 Chemical stability

The product is stable under recommended handling and storage conditions.

10.3 Possibility of hazardous reaction

Polymerization may occur. It is exothermic and can degenerate into an uncontrolled reaction.

10.4 Conditions to avoid

Avoid exposure to strong UV sources and to sunlight. Avoid direct contact with heat sources.

#42

10.5 Incompatible materials

Materials to avoid: acids, bases, oxidizing agents and reducing agents.

10.6 Hazardous decomposition products

Formation of toxic products through combustion: carbon oxides.

11. TOXICOLOGICAL EFFECTS

11.1 Information on toxicological effects Harmful if inhaled (ATEmix: 3,6 mg/L)

Causes skin irritation

Causes serious eye irritation

May cause an allergic skin reaction

May damage fertility and suspected of damaging the unborn child

May cause respiratory irritation

Precautionary statements

Prevention

P264 Wash hands thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P261 Avoid breathing dust/fume/gas/mist/vapors/spray.

P272 Contaminated work clothing should not be allowed out of the workplace.

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P405 Store locked up.

P403+P233 Store in a well-ventilated place. Keep container tightly closed.

P271 Use only outdoors or in a well-ventilated area.

P501 Dispose of contents / container in accordance with local / national / international regulations.

P273 Avoid release to the environment.

P391 Collect spillage.

Intervention

P302+P352 If on skin: wash with plenty of water.

P332+P313 If skin irritation occurs: Get medical advice/attention.

P305+P351+P338 If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing.

P304+P340 If inhaled: Remove person to fresh air and keep comfortable for breathing.

P337+P313 If eye irritation persists: Get medical advice/attention.

P308+P313 If exposed or concerned: Get medical advice/attention.

P362+P364 Take off contaminated clothing and wash it before reuse.

P312 Call a poison center or doctor if you feel unwell.

4. FIRST AID MEASURES

4.1 Description of first aid measures

Skin Contact: Destroy or thoroughly clean contaminated shoes. Immediately remove contaminated clothing and shoes and wash skin with soap and plenty of water. If skin irritation or an allergic skin reaction develops, get medical attention.

Eye Contact: Wash open eyes immediately, abundantly and thoroughly for at least 15 minutes. Seek advice of an ophthalmologist if necessary.

Inhalation: Move to fresh air.

Ingestion: Do NOT induce vomiting. Rinse mouth. Consult a physician if necessary.

4.2 Most important symptoms and effects, both acute and delayed

See section 11 for additional information on health hazards.

4.3 Indication of any immediate medical attention and special treatment needed

See section 11 for additional information on health hazards.

5. FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media: Extinguish with foam, carbon dioxide, dry powder or water fog. Unsuitable extinguishing media: Do not use water jet as an extinguisher, as this will spread the fire.

5.2 Special hazards arising from the substance or mixture

During fire, gases hazardous to health may be formed (Carbon oxides).

5.3 Advice for firefighter

Special firefighting procedures: No data available.

Special protective equipment for fire-fighters: Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

See Section 8 for Personal Protective Equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Keep unauthorized personnel away.

6.2 Environmental precautions:

Avoid release to the environment. Prevent further leakage or spillage if safe to do so.

6.3 Methods and material for containment and cleaning up:

Stop the flow of material, if this is without risk. Absorb with sand or other inert absorbent.

6.4 Reference to other sections

See Section 7 for handling

See Section 8 for Personal Protective Equipment.

See Section 13 for waste disposal.

7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Avoid contact with eyes, skin, and clothing. Wash hands thoroughly after handling. Keep away from heat, sparks and flame. Do not eat, drink or smoke when using material.

7.2 Conditions for safe storage, including any incompatibilities

Store between 15°C and 30°C max (59-86°F) and in original container. Protect from frost, heat and sunlight (risk of polymerization). Keep away from open flames, hot surfaces and sources of ignition. Make sure of the presence of air and inhibitor in the drums. In addition, the product's inhibitor(s) require the presence of dissolved oxygen. An air

#42

space is required above the liquid in all containers; avoid storage under an oxygen-free atmosphere. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

7.3 Specific end use(s)

Reserved for industrial and professional use

8.2 Exposure controls

Appropriate engineering controls:

Provide adequate ventilation.

Personal protective equipment:

Safety glasses

Gloves

Respiratory protection: In case of inadequate ventilation use suitable respirator.

Hand protection: Protective gloves should be used if there is a risk of direct contact or splash. Chemical resistant gloves required for prolonged or repeated contact. Nitrile gloves are recommended but be aware that the liquid may penetrate the gloves. Frequent change is advisable. The most suitable glove must be chosen in consultation with the gloves supplier, who can inform about the breakthrough time of the glove material.

Eye/face protection: Safety glasses with side-shields. Do not wear contact lenses.

Skin and body protection: Long sleeved clothing

Environmental exposure controls:

See Section 6

9. PHYSICAL AND CHEMICAL PROPERTIES

10. STABILITY AND REACTIVITY

10.1 Reactivity

No data available.

10.2 Chemical stability

The product is stable under recommended handling and storage conditions.

10.3 Possibility of hazardous reaction

Polymerization may occur. It is exothermic and can degenerate into an uncontrolled reaction.

10.4 Conditions to avoid

Avoid exposure to strong UV sources and to sunlight. Avoid direct contact with heat sources.

#42

10.5 Incompatible materials

Materials to avoid: acids, bases, oxidizing agents and reducing agents.

10.6 Hazardous decomposition products

Formation of toxic products through combustion: carbon oxides.

11. TOXICOLOGICAL EFFECTS

11.1 Information on toxicological effects Harmful if inhaled (ATEmix: 3,6 mg/L)

Causes skin irritation

Causes serious eye irritation

May cause an allergic skin reaction

May damage fertility and suspected of damaging the unborn child

May cause respiratory irritation
