The Minolta Group

The Minolta Group, the Company and its affiliated companies, consists of Minolta Co., Ltd. and its 89 subsidiaries and 5 affiliates. The Group is mainly engaged in business operations from development, manufacture and sales to after-sale services related to image information products and optical products.

The main products and main companies in charge for each operational category are as follows. These categories are the same as the classifications by industry in the segment information.

Main products

Operational category	Products category	Main products
Image information products	Copiers	Digital copiers
		Digital full color copiers
		Analog copiers
	Printers	Laser printers
		Full color laser printers
	Others	Microfilm equipment
		Facsimile
Optical products	Photographic equipment	Single lens reflex cameras
		Compact cameras
		Digital cameras
		Lenses
		Binoculars
	Radiometric instruments	Industrial instruments
		Optical medical instruments
		Photographic meters
	Optical devices and components	Optical units
	Others	Planetariums
Other		Products not included in the abo

Note: 1. Figures of holding ratio in parentheses indicate indirect holding ratio which are included in total value of ratios.

The following chart shows situations of operational system.

Note: The above chart is as of March 31, 2002.

Management Policy and Overview of Performance

1. Management Policy

Fundamental Management Policy

Minolta established "The essentials of imaging" as its corporate slogan, and has made this slogan the nucleus of its business operations, through which we achieve a corporate brand that our customers find indispensable to the world of imaging. In order to pursue the concept set forth in our corporate slogan, and achieve the medium-term management plan, we introduced a new internal company system in April 2002. The internal company system further propels us toward achieving our goals, and allows us to reorganize in a manner that conforms to today's market segments, making it possible for us to enhance customer responsiveness. At the same time, we will achieve greater managerial speed by allocating a broader scope of authority to the internal company presidents and executive officers. Through this, we aim to increase the individual profitability of each internal company and further strengthen our market competitiveness.

Minolta's new corporate structure consists of three internal companies and five corporate headquarters staff organization units. We aim to increase customer satisfaction by creating closer relationships between our customers and the various functions of each internal company. The ultimate goal of the new company system is that each company will establish a firm position in its respective business. The outlines of internal companies are as follows.

Image Information Products Company

This company aims to establish a leading position in the field of color by maximum use of the efficiency created from the merger of our mainstay MFPs (Multi Functional Peripherals), printers, and image-chemical related businesses, as well as by concentrating and combining the technologies and know-how in the field of digital imaging. In addition, the company aims to strengthen its capacity in solution development and establish a strong position in the fields of digital and color.

Optical Products Company

This company aims to achieve a synergy between optical and digital technologies, areas of core competence for Minolta, as well as increase operational efficiency. By merging our optical products business (camera business) and optical systems business (optical device business), the company will further strengthen its presence in the market.

Instrument Systems Company

This company aims to contribute to further increases in profit by strengthening the existing high value-added products of the company and the company's ability to accurately respond to customers' needs.

The staff departments of the corporate headquarters are reorganized into five organizational units handling group strategies, corporate affairs, shared lateral functions, research and development, and new business development. Through this, Minolta aims to strengthen the operational strategy planning and execution capacity of the group as a whole, and provide support for the commonly shared functions of each company. Research and development, in particular, is reorganized into the fields of image information and optical technologies in order to increase responsiveness to the market needs with efficient research and development activities.

Basic Dividend Policy

Minolta's basic dividend policy is determined based on the Company's profitability. It takes into consideration our goals of resuming a dividend and maintaining a stable dividend level by achieving profit targets based on the previously mentioned fundamental management policy. It also considers the accumulation of internal reserves required for future business development, while continuing to invest in developing products in fields with strong growth potential and strengthening the company's financial structure.

Medium-term Management Strategies

Giving priority to the following three principles, the company's management is aggressively striving to achieve its objectives.

- (1) Strengthening business competitiveness
- (2) Improving profitability
- (3) Qualitative improvement of business management

Moreover, we will strive to boost corporate value of Minolta as well as establish lean but solid management by strengthening cash flow. We will also accelerate reduction of interest-bearing debts and enhance shareholders' equity.

Minolta's Task

Because exports can be as much as 80% of all sales, we recognize the importance of establishing flexible financial structures to withstand foreign exchange fluctuations. In order to overcome challenges, we will concentrate on strengthening product features and our capabilities for providing solutions, as well as strengthening the company's financial structure. At the same time, we will seek optimally efficient locations for manufacturing and procurement, providing timely products and services to customers all over the world, with "customer first" as our primary policy.

We will strive to become a futuristic corporation in the digital field, introducing products and services that anticipate the future's rapid growth of Information Technology and digitization. In addition, we will execute our business plans while leveraging core competencies, enabling Minolta to maintain a firm position in the color output field as a leading company in image inputting and outputting.

For environmental preservation activities, Minolta has been actively working to introduce environmentally sensitive products, and to also recycle used products throughout the entire Minolta Group.

By the end of March 2003, Minolta expects to complete the structural change that will establish a lean but solid foundation of management. We will continue to accelerate reduction of Group fixed cost, procurement cost, and inventory levels. As a result of the change which was previously announced, as of March 2002 our set targets for this fiscal year have been achieved. We will go further with the structural change and strive to achieve the final goals of our medium-term management plan.

By successfully completing all of these tasks, we will do everything possible to boost the worldwide brand value, and corporate value, of Minolta.

2. Overview of Performance

(1) The Period under Review (The fiscal period ended March 31, 2002)

During the period under review, the U.S. economy deteriorated as a result of rapidly declining Information Technology spending, the adverse effects of the terrorist attacks in September 2001, reduced capital spending, and major reductions in inventory levels. The European economy generally took a downward turn while the Asian economy, except for China, showed signs of sluggishness.

In Japan, the economy continued to decline, with weak personal consumption as consumers responded to high unemployment and falling personal income. The corporate sector remained severely depressed due to a weakening worldwide economic picture. During the period under review, the yen depreciated against the U.S. dollar and the Euro, when compared with the same period one year ago.

Despite these economic conditions, Minolta strengthened its focus on the marketing and R&D of digital products that anticipates advanced Information Technology and digitization. At the same time, we accelerated structural changes that included the reduction of fixed costs, procurement costs, and inventory levels.

Minolta strengthened the lineup of the DiALTA series in the digital copier field and expanded sales of printers, especially color printers, by developing new sales channels. In Optical Products, we aggressively worked to expand sales by assuming full-scale operation in the digital camera market.

Image Information Products Operations

In the copier market during the period under review, the digital share of the total market continued to increase on a worldwide basis. Responding to the trend, Minolta expanded the lineup of digital copiers by introducing six new models. These included the DiALTA Di152f/Di152 and DiALTA Di183f/Di183, low-speed compact digital copiers featuring 600dpi high resolution, and DiALTA Di650 and DiALTA Di750, high-speed digital copiers featuring versatile finishing function and high-resolution using polymerized toner. Moreover, DiALTA Color CF1501 and DiALTA Color CF2001, digital full-color copiers, contributed to expanding Minolta's share in color MFPs backed by the company's good reputation in the market.

In the printer category, despite the sluggish growth of the printer market, Minolta developed new sales channels and increased its share in Europe as a result of the growing sales of the Magicolor2200, a Minolta-QMS color printer. We also expanded our OEM business, deriving maximum benefit from the business alliance. Overall sales of the Image Information products were Yen 381,906 million, an increase of 7.1% compared with the same period of the previous year, resulting in an operating income of Yen 10,816 million, up by 7.6% compared to the same period in the previous year.

Optical Products Operations

In the camera market during the period under review, digital cameras continued to show strong growth. Minolta introduced six models of digital cameras with unique features, including DiMAGE 7, a SLR-type digital camera with 7X optical zoom and a 2/3-type CCD with a total of 5.24 million pixels, and DiMAGE X, a 20mm depth flat and slim digital camera with 3X optical zoom. Thanks to the contribution of these products, the sales of digital cameras significantly improved in both units and revenue compared with the same period of the previous year. As for film cameras, we marketed the compact -Sweet II SLR (Single Lens Reflex) camera and the CAPIOS 160A and CAPIOS 140A compact cameras, which employ the world's largest AF area in a film camera

Sales of optical devices and components contributed to overall sales, especially sales of optical units for digital projectors and minilabs, as well as glass substrates for hard disks. In the field of radiometric instruments, we marketed two models of high-speed color analyzers, CA-210 and CA-100Plus, used for evaluating chromaticity and luminance of such devices as color LCDs and displays, and contributing to increased productivity and efficiency in the field of R&D. We also sought to expand sales of spectrophotometers and 3D digitizers.

Overall sales of optical product operations increased 12.8% from the previous fiscal year, to Yen 107,992 million. However, this resulted in an operating loss of Yen 7,237 million.

Other Business Operations

Sales of other business operations, which primarily comprise the wholesale trade of electric appliances and the manufacture and sale of parts, were Yen 20,962 million, an increase of 75.9% compared with the same period of the previous year. Operating income was Yen 330 million, up 34.1% compared with the same period of the previous year.

Overall net sales for the fiscal year under review were Yen 510,862 million, up 10% or Yen 46,573 million from the previous fiscal year. Ordinary loss amounted to Yen 7,890 million, mainly due to severe price competition in a weakening economy and inventory revaluation and disposal. Net loss was Yen 34,350 million, due to the revaluation of a controlling interest in a sales subsidiary, as well as payments for the Early Retirement Incentive Plan, one of the measures to accelerate our structural change. The loss was also due to revaluation of investments in securities, brought about by declining securities prices.

On a non-consolidated basis, net sales edged down 2.5% from the previous fiscal year to Yen 272,105 million. Ordinary loss was Yen 1,531 million, while net loss was Yen 33,596 million.

Given the performance results of the fiscal year, Minolta has decided to forgo a year-end dividend in the current fiscal year.

(2) Cash Flow

Despite the net loss before income taxes amounted Yen33,569 million, cash flow from operating activities was Yen 37,275 million, mainly due to a reduction in inventory and a decrease in accounts receivable. In particular, the amount of inventory improved by Yen 45,064 million due to a production adjustment, in combination with inventory revaluation and disposal. Cash flow from investing activities was Yen 22,375 million, reflecting reduced capital expenditure in the 2nd half of the period. Consequently, free cash flow rose by Yen 14,900 million. Cash flow from financing activities was Yen 4,647 million, mainly resulting from repayment of bank loans. As a result, cash and cash equivalents at the end of the fiscal year were Yen 38,505 million, a Yen 11,391 million overall increase from the end of the previous fiscal year.

Note: (alpha) series SLRs marketed in Japan and China are marketed as the MAXXUM series in North America and the DYNAX series in Europe, Asia Pacific countries and other areas not mentioned above. CAPIOS series compact cameras marketed in Japan and China are marketed as the Freedom series in North America and the RIVA series in Europe, Asia Pacific countries and other areas not mentioned above

(3) The Current Fiscal Year (The fiscal year ending March 31, 2003)

Regarding the outlook for the world economy, Europe and the U.S. show slight signs of recovery while an upturn in the Japanese economy is not expected soon due to continued high unemployment, restrained consumer spending, and declining profits in the corporate sector. In the markets for MFPs, printers, and cameras, which are the markets Minolta competes in , the business environment is likely to remain severe for the foreseeable future.

In response to challenging market conditions, Minolta will concentrate the capabilities and resources of the Group companies on achieving growth in sales and profit. In particular, we will continue to work to expand sales of digital products. Moreover, we will target growth in sales of the color output field by offering a total system for color document solutions that combines input/output hardware and software.

Currently, Minolta has not yet set a goal for the amount of dividends that the company will pay, however, we will put forth more effort to resume dividends.

Our forecasts of performance for the full fiscal year ending March 31, 2003, are as follows:

		in millions	As compared with the previous fiscal year
1. Consolidated base	Net sales	530,000	103.7%
	Recurring income	8,000	%
	Net income	6,000	%
2. Non-consolidated base	Net sales	290,000	106.5%
	Recurring income	5,000	%
	Net income	3,000	%

In estimating these figures, we set the foreign exchange rates for the second half of the fiscal year ending March 31, 2003 as $\pm 125 = US\$1$ and $\pm 110 = EUR1$.

* The above-mentioned forecasts are the results of estimations based on currently available information, and accordingly, contain risks and uncertainties. The actual results of business performance may sometimes differ from these forecasts due to various factors.

Notes:

1. Method of Classification of Categories

Based on consideration of similarities and other characteristics regarding product end-users, manufacturing processes and markets and marketing methods, business operations have been classified into the categories of image information product operations and optical product operations. Products that do not fall into these categories are classified as other operations.

2. Principal Products by Operational Category

Image information products Photocopiers, printers, micrographic equipment, and facsimile machines Optical products Cameras, lenses, radiometric instruments, and planetariums Other operations Products not included in the above categories

 The assets in the estimations or companywide columns are principally excess funds under management (cash and negotiable securities) of the parent company and long-term investments (investment securities) of the parent company. March 2002 ¥55.410 million

March 2002	±00,410 million
March 2001	¥61,572 million
